So I it's veary rare that I will write a review for a game, however I feel that this deserves a review.

POSITIVE: THE GAME IS AMAZING, within the first day of having the game I logged around 5-6 hours on it.... the UI seems to have improved since the original gameplay, the calls are interesting, and the overall enjoyment of the game is present.

NEGATIVES: BUGS EVERYWHERE, however the development team is ontop of there game and just looking at there discussion board has reassured me that they are worikng on sollutions to the game.

OVER ALL: I believe that there should have been a little bit more testing in the beta stages, however I also see from a developers point. When people are beging and asking for a game to be released, you just want to put out the product.. Fun litte breakout type game with funny characters. I would recommend getting it with a discount but the developer seems amazing and it is really cheap so go and support the dev !. Absolutely brilliant all the way through!. <https://youtu.be/p-ucpkZp5nE>

Well it is simple, it is in space and it does have neon.

Nothing ground breaking here but at a low cost point this is a solid little arcade puzzle type affair.

Looking for something to keep a kid busy for a rainy afternoon? This will do nicely.

. Always wanted to play it when i saw it when i was a kid. Recently i got it, played it and loved every min of it.

i give it

10/10

BEST. GAME. IN. HISTORY. :). So far I'm enjoying this game, I've been recently streaming it on a streaming platform that's fairly new. I still get terrified of it whenever I play it.. This game had a nice concept that could've been fun with proper balancing; yet sadly it didn't. No matter how much you prepare your villagers, no matter what strategy you go at this game with, you just get massacred once the dead start waking at night. Pixel Survivors had everything in place to be good, but executed poorly. A few updates to the AI systems could fix it but development has gone dormant. On that note, I would not recommend this game sadly.. My very first game that i have not finished.. A tragic game from all aspects... Just uninstall it!. I hate myself for even owning this trash.. Wow - finally a fresh VR experince which is truely immersive! You have to like to maintain a space ship on its travel through space - pretty cool graphics of the various ship rooms and the drones. You spend some time repairing stuff and some time looking for resources - I have only played for an hour so will update after a while - but what I have seen so far is really impressive
